Notes

[1] Enrollees are defined as students pursuing an Associate's or Bachelor's degree full-time in the Fall 2017. Enrollments are not mutually exclusive, some enrollees are concurrently enrolled at more than one college. Further, students enrolled in the fall may or may not have been enrolled in the spring; however, they are still counted in wage visibility.

[2] Enrollees were counted as visible in the wage data if they had a wage record in Q3 of 2017 and Q4 of 2017. These wage periods cover the period of July through September (Q3) and October to December (Q4). Using both Q3 and Q4 to evaluate wage visibility helps minimize the appearance of enrollees in the wage data who may have only worked in the summer leading up to the fall term or over the term break in December.

[3] Enrollees were counted as participating in work-study, receiving an institutional scholarship or both if they had a record in the financial aid information system for the academic year of 2017 to 2018. This collection does not distinguish single semester awards from full-year awards.

Wage data are effective through December 2018. MLDS wage data do not include information on military service, apprenticeships, self-employment, out-of-state employment or Federal Government employment therefore it is incorrect to assume that enrollees not counted as "employed" are unemployed.

These data support the center report *WAGE VISIBILITY FOR FULL-TIME UNDERGRADUATE STUDENTS IN MARYLAND'S COLLEGES* and are based on data contained within the MLDS on March 27, 2019. The MLDS may only report aggregate, de-identified data.

To protect student privacy, values of 10 or fewer are masked. Additional values are masked to prevent calculating masked values when groups totals and sub-totals are provided.
